

AXEL STANKIEWICZ

Full-Stack Web Developer

Châlons-en-Champagne, Grand Est, France | +33 7 50 44 28 60 | stankiewiczaxel1@gmail.com
axelstz.fr | linkedin.com/in/axelstankiewicz | github.com/SHOOTSTV

PROFESSIONAL SUMMARY

Full-stack web developer specializing in modern, type-safe SaaS applications with the Next.js, React and TypeScript ecosystem. Designed and shipped a production SaaS platform backed by 217+ automated tests, secure Supabase/Postgres data access (Row-Level Security) and Stripe-powered subscriptions. Comfortable owning features end to end — from database schema and REST APIs to accessible, internationalized UIs. Quick learner with a strong focus on code quality, testing and clean architecture. Fluent in French; English at C1.

TECHNICAL SKILLS

Languages	TypeScript, JavaScript (ES6+), SQL, HTML5, CSS3
Frontend	React, Next.js (App Router, RSC), Tailwind CSS, Recharts, next-intl (i18n)
Backend	Node.js, Supabase (Postgres + RLS), Prisma ORM, REST APIs, MySQL, Upstash Redis
Testing & Quality	Vitest, Zod (schema validation), Sentry (monitoring), strict TypeScript
Payments & Tools	Stripe, Git / GitHub, Vercel, pnpm, VS Code, CI workflows
Languages (spoken)	French (Native), English (C1)

PROJECTS

MacroTrackr — Full-Stack Nutrition-Tracking SaaS 2025 — In production

Next.js 16, React 19, TypeScript, Supabase, Tailwind v4, Stripe, Vitest • github.com/SHOOTSTV/macrotrackr

Calorie and macronutrient tracking platform with a personalized food library, meal history and trend visualization (Recharts).

- Architected the app on Next.js App Router with React Server Components and strict TypeScript, achieving 217+ test cases across 46 Vitest suites for reliable releases.
- Engineered a secure Supabase/Postgres data layer with Row-Level Security and three scoped client tiers (browser / server / admin); enforced per-IP and per-user rate limiting via Upstash Redis.
- Integrated AI-assisted meal logging from photos and Stripe subscriptions with payment links; instrumented production monitoring with Sentry.
- Built an EN/FR internationalization layer with next-intl and localized routing, plus a Tailwind v4 design system (CSS tokens, dark/light themes).

FloatVision — CS2 Trading Chrome Extension (Manifest V3) 2025 — In progress

TypeScript, Chrome MV3, Supabase • github.com/SHOOTSTV/floatvision

Chrome extension that intercepts CSFloat marketplace data and overlays real-time analytics on listings.

- Developed a Manifest V3 extension that surfaces live market analytics and drives an automated deal-scanning engine.
- Persisted scan results and user preferences in a Supabase (Postgres) backend.

EDUCATION

BTS Services Informatiques aux Organisations (SLAM) — Software Development 2020 – 2022

CNED (Distance Learning)

Baccalauréat STI2D — Information & Digital Systems (SIN) 2017 – 2019

Lycée Étienne Oehmichen, Châlons-en-Champagne
